RECEIVED

JUN 10 1988

CMPL SECTION

08 JUN 1988

MEMORANDUM

SUBJECT: St. Louis Airport Drum Site

FROM: Robert Dye  
Health Physicist

*Robert Dye*

TO: John Chen  
Superfund

Radiological data on samples taken from the subject site by the Department of Energy was reviewed at your request.

Soil, water and fluid sample results all indicate levels at or near background. This data, added to that compiled by the contractor at the site, indicates that only natural radioactivity is present and does not represent a radioactive contamination problem where the drums were excavated.
